

<b>Project Name</b>	Best Community Service
<b>Scope Description</b>	<p><b>In Scope:</b></p> <ul style="list-style-type: none"> <li>- A working software prototype</li> <li>- Estimations for building a complete online system (including both user-side and back-office application development estimates)</li> </ul> <p><b>Out of Scope:</b></p> <ul style="list-style-type: none"> <li>- Show how managers will run the business</li> <li>- Show how HR person will process the payroll</li> <li>- Include files or databases to store actual data</li> </ul>
<b>Project Deliverables</b>	<ul style="list-style-type: none"> <li>-Software Requirements Specification</li> <li>-Detailed software design document</li> <li>-Detailed project management plan (including scope, budget, and schedule)</li> <li>-Working prototype for an Interactive Web Application (User-facing only)</li> </ul>
<b>Acceptance Criteria</b>	The software will be accepted when the deliverables have been verified to meet the needs of Best Community Service
<b>Constraints</b>	<ul style="list-style-type: none"> <li>- The software must be reliable, as customers receive service that can be important to their health (shuttling services and home care)</li> <li>- The software must be secure, as personal and financial information will be processed in account management and donation / fee processing.</li> </ul>
<b>Assumptions</b>	<ul style="list-style-type: none"> <li>- The software will run online.</li> <li>- I am responsible for extracting customer 'needs' from the specified customer 'wants'.</li> <li>- The project description received is high-level, not final.</li> <li>- The software will show all screens that a user will need to access.</li> <li>- Data does not need to be handled by any real backend system for the prototype.</li> </ul>
